

LETTER TO ME IN THE FUTURE OF 2030

REMI NAGASE

HOW TO RELATE TO MYSELF AND THE ENVIRONMENT IN 2030?

- I will be working at an office and living in a city.
- = There are few opportunities to interact with nature.
- & I will be limited to a casual encounter during leisure time.

WILL MY RELATIONSHIP WITH NATURE DISAPPEAR IN MY DAILY LIFE?

There are two ways !

- Pay attention to the process
- Get in touch with nature in park and other familiar places.

PAY ATTENTION TO THE PROCESS

People have been living in harmony with the natural environment since ancient times, and some products and culture are produced from natural environment.

However, now, we are more interested in the finished product than the process., like Chimaki.

This trend makes it difficult to maintain the culture.

→ To pay attention to the process can make it possible to maintain the industry and culture and coexist with nature.

A photograph of a park bench in a lush green field. The bench is made of dark brown metal with wooden slats. It is positioned on a paved path that leads into a grassy area. In the background, there are several large trees with dense green foliage. The scene is bright and sunny, with dappled light on the grass and the bench. The overall mood is peaceful and serene.

GET IN TOUCH WITH NATURE IN PARK AND OTHER FAMILIAR PLACES.

Even in a familiar place, it is different from seeing it with my eyes and feeling it with other senses.

We can notice new things that we never felt before and experience something fresh.
